

PARTICIPATION MANAGEMENT AND ECONOMIC POLICIES FOR THE DEVELOPMENT OF IRRIGATION AND DRAINING

Anna Maria MARTUCCELLI (*)

Focusing on “Participation management and economic policies for the development of irrigation and draining”, topic 4 requires the analysis of different aspects, in particular the economic, political-institutional and legislative aspects, in order to obtain a proper method of investigation to identify guidelines and operating strategies in compliance with European principles.

In accordance with and with respect to the agreed times during Conferences, the economy of the present report includes the analysis of all previously mentioned aspects, yet only in their basic rules and principles deriving from the general guidelines of the European Union, with no detailed reference to the single countries’ current status, however without lacking in completeness or coherence whatsoever.
